	8 ft Frame	27.95 lbs
	10 ft Frame	32.98 lbs
Standard	OSHA 1910.29 App C OSHA 1926 Sub part M	

DESCRIPTION

The Big Horse Guardrail System is a new and non-penetrative solution for rooftop fall protection. It meets the requirements set by OSHA for guardrail systems, specifically 1910.29 and 1926.502. Our system is suitable for both rooftop and ground-level applications. It's compatible with all commercial roofing materials and is available in standard safety yellow, galvanized steel, or powder-coated finish.
